

Featuring a flat alder body, bolt-on neck, steel bridge components, and three proprietary PRS DC3 singlecoil pickups based on PRS's award-winning 513 model platform, the DC3 has a warm, vintage tone and loads of modern appeal. The steel components in the bridge retain the balanced resonance of the alder and provide a clear, but expansive tone, and the three-pickup configuration combined with a 5-way blade pickup selector offers ample switching possibilities. You've got to hear this guitar.
